-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

Claims 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tokura et al (4,587,843). Note a system for controlling intake air temperature in an internal combustion engine suitable for heating intake air, controlling the temperature and knowing the flow rate of the airflow, the system comprising a module including heating means and a control circuit 64, said module being placed at each intake inlet in order to heat and control the temperature of the intake air up to a limit at which the temperature is maintained constant and independent of ambient temperature (see column 4, lines 43-67), the heating means including a resistor having two segments made of different metal alloys, joined on one of their ends to form a thermocouple J, J', the joint of said segments being placed in centre of an intake duct 4, wherein the control circuit is connected to an electronic control unit 7 of the engine, with an interposed interface that can be analogue or digital. Note that it is inherent that the interface will be either analog or digital, since those are the only two options. Tokura et al show everything except employing the device in a diesel engine. It would have been an obvious matter of design choice to utilize the device in a diesel engine, since diesel engines are conventional.

### ***Allowable Subject Matter***

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
